

Name: Scream Thrill Ride
Owner: Six Flags Fiesta Texas
Location: San Antonio, Texas, USA
Products: Amerlock 2
PSX 700
Date: January 2006

The Six Flags Fiesta Texas amusement park is located just 15 minutes from downtown San Antonio. Thrill-seekers are secured to the rides' floorless seats on either of three towers, catapult 20 stories (164 feet!) over the park, and then plummet back to earth at dizzying speeds.

In January of 2006 the park awarded to Baynum Painting of Covington, Kentucky the project of repainting the ride, and PPG high-performance coatings were selected to protect the its carbon steel structure, while providing a most attractive appearance.

The coating system chosen will provide the ride exceptional protection against corrosion and varying weather conditions:

- One coat of Amerlock 2 fast-drying, surface-tolerant, VOC-compliant epoxy
- A topcoat of PPG's patented PSX 700 engineered siloxane, which offers breakthrough weather resistance and corrosion control
