

Name: Viper Roller Coaster
Owner: Six Flags Theme Parks
Location: Six Flags Magic Mountain
Valencia, California, USA
Products: Amerlock 2
Amershield VOC
Date: November to December, 2007

The Viper Roller Coaster at Six Flags Magic Mountain just outside Los Angeles, CA has it all. Passengers travel along its 3,830 feet of track at speeds of up to 70 mph and experience its distinctive, coiling track; the world's tallest vertical loop at 140 feet; two other loops of 90 and 62 feet; a corkscrew 40 feet tall; and a double-barrel boomerang turn.

In the fall of 2007, Six Flags awarded to Baynum Painting of Covington, Kentucky the project of repainting the ride, and PPG PMC high-performance coatings were selected to protect the structure, while providing a most attractive appearance. The surface of the ride's carbon steel structure was prepared by 5,000 psi water blasting to SSPC-SP 2 and 3 standards. The chosen coating system will provide the ride exceptional protection

against corrosion and varying weather conditions: one coat of Amerlock 2 fast-drying, surface-tolerant, VOC-compliant epoxy, followed by a final coat of Amershield VOC aliphatic polyurethane, which offers breakthrough weather resistance and corrosion control.
